Standard EV charger installation price includes a suitable 7kW home charger, standard installation, up to 5m cable run, standard wall mounting, testing, commissioning and certification. Subject to site survey and suitable existing electrical supply. Charger make/model may vary; premium charger models, unusual cable routes, load management, solar integration, groundworks and DNO works are charged separately.

SERVICE AREA & TRAVEL

Zone 1 — Stafford: Stafford, Baswich, Doxey, Weeping Cross, Walton, Littleworth, Castlefields and Tillington.

Zone 2 — Nearby Staffordshire: Stone, Rugeley, Penkridge, Eccleshall, Cannock, Great Haywood, Hixon and Uttoxeter.

Zone 3 — Wider area: Lichfield, Stoke-on-Trent, Newcastle-under-Lyme and wider Staffordshire, Wolverhampton — travel may be charged or quoted separately.

IMPORTANT PRICING NOTES

Prices are guide prices for standard domestic installations and may change following site inspection.

Prices assume suitable existing wiring, access and electrical infrastructure unless otherwise stated.

Materials are included where specifically stated; specialist, premium or customer-requested materials may incur additional charges.

Additional remedial work, difficult access, extended cable routes, making good and building work are charged separately where applicable.

Fault finding is charged by time after the initial allowance where the fault requires additional investigation.

EICR and testing prices cover the inspection/testing itself; remedial works are quoted separately.

All work is subject to applicable electrical regulations, testing and certification requirements.

VAT: prices are marked as exclusive of VAT.
